### Description

#### Version:

High-performance line of LED LENSER for general- purpose use. Drop tested from a 1 m height. LED lenses are amongst the technology leaders for LED torches. Within the **splash-proof aluminium housing**, all the contacts are gold-plated, **high-quality lenses** gather the light uniformly and without losses. All these high-class torches incorporate the patented **Advanced Focus System**.

- **Advanced Focus System (AFS)**

**The Advanced Focus System is a combination of lens and reflector, thus incorporating the advantages of both systems. The result is an outstanding concentration of light in focus, together with a largely homogeneous unfocussed light beam. This makes the AFS one of the best focussing systems in the world for LED lamps.**

- **Rapid Focus**

**Conventional focussing systems with twist knobs must be operated manually with both hands. Rapid Focus, on the other hand, allows quick adjustment of the light beam with only one hand.**
