Description

Version:

Yoke with wing screw for mounting on the steel clamp slide beam. Burnished spindle with movable jaw.

Application:

In conjunction with steel clamps for clamping on to face strips and edge strips as well as for clamping from three sides. Also supports the slide beam when clamping with very long steel clamps to stabilise the clamping pressure.

Suitable for :

Steel clamps with maximum slide beam cross section 45×12 mm.
overall length: 225 mm
