

Safety shut-off Stream-Line, Hose connection internal Ø (nominal bore): 11 mm

Order data

Order number	080297 11
GTIN	7391390285331
Item class	08A

Description

Version:

Steel couplings have many advantages in pneumatic systems compared to standard brass couplings:

- **Easy to use with only one hand with low coupling force.**
- **High flow rates as a consequence of very low pressure drop.**
- **Long working life due to surface treatment and hardened components with tight manufacturing tolerances.**
- **Cost-effectiveness – the amortisation time is 2 years at the most.**

The **eSafe safety coupling** satisfies the ISO standard 4414 and EN 983. It is first depressurised and then decoupled in a second step (no whiplash). New improved single-handed operation.

Rate of flow: 2250 ltr/min, maximum operating pressure 16 bar.

Stream-Line hose adapter simply and effectively clamps the hose on to the coupling by means of a threaded nut - no hose clip required.

Application:

For improving the performance, economics, and safety of industrial compressed air installations.

Note:

The CEJN series 320 satisfies Euro standard 7.6 (nominal Ø 7.6 mm, Euro profile) and is compatible with all popular systems.

Technical description

Hose connection internal Ø (nominal bore)	11 mm
