

Magnetic holder, Type: M

Order data

Order number	081258 M
GTIN	5708997353905
Item class	08C

Description

Version:

Compact and very powerful magnetic holder for flexible positioning of NOVA work lamps on all magnetic surfaces. The magnet is extremely powerful with a retention force of more than 20 kg or 200 N. To protect the surface from scratching the magnet is sheathed with rubber. The magnet can be turned to any position, for maximum flexibility. This allows the magnetic holder to be used even on very small magnetic surfaces. The simple magnetic holder with one-hand operation ensures quick and secure attachment, and allows the lamp to be tilted to any position necessary for the daily work. The inbuilt stop mechanism prevents the restraining pin falling out and becoming lost. The restraining pin can however be removed if required.
