

Mixer for cooling lubricant emulsion

Order data

Order number	084370
GTIN	4037728712027
Item class	08J

Description

Version:

The mixer with the **universal screw fastening set** fits all commercially-available jerrycans and drums. A needle valve allows the **mixing ratio to be set precisely**. High repetition accuracy, mixing volume up to 370 l/h, connections 1/2 inch (water feed and mixer outlet), 3/8 inch (concentrate inlet). With safety non-return valve.

Application:

Compact mixer for quick and precise mixing of the desired emulsion concentration of coolant, grinding and lubricating fluids.
