Description

Version:

All components and attachments satisfy **metric standard ranges**, which considerably simplifies assembly, service, and the procurement of spare parts. **100 % compatibility** with all commercially-available 700 bar hydraulic systems.

Universal cylinders are characterised by extremely **good side load capability**, they are fitted with spring return and have only one hose connection.

Application:

For all compression operations where high force has to be developed in a confined space. Ideal for use in jigs and workshop presses thanks to the fitting of metric threaded securing points as standard. **Can be used at any angle.**

Supplied with:

Supplied with 3/8 NPT pressure connection. Equipment is supplied ready to use, including connection sleeve, hardened steel load piece (head) and securing thread **without** connection hoses and adaptors.

Note:

Closed systems are pre-mounted ex works, filled and air bled.

For hydraulic hand pump see No. 086050, hydraulic hose No. 086081, pressure gauge No. 086087.
