## Description

## Version:

3-flute drill, specially developed for use at very high feed rates. Outstandingly suitable for machines with high installed power and stable operating conditions.

- Special cutter geometry with stable cutting edges and large clearance at the centre enables very high feed rates.
- The patented tip is optimised for chip flow and generates low cutting pressure with good chip breakage.
The sector-leading technology of the drill point guarantees optimum self-centring
behaviour. 3 guide chamfers guarantee a stable exit from the hole and an exact roundness of the hole.

## Recommendation:

Maximum drilling depth:
flute length (see table) less $1.5 \times$ nominal $\varnothing$.

## Note:

Flute length $L_{C}=L_{2}+1.5 \times D_{C}$.
For process reliability when using the $12 \times$ D drill, an initial centre drilling with an NC spotting drill No. 121130 with $\mathbf{1 5 5}^{\circ}$ point angle is necessary.
Standard: Manufacturer's standard
Tolerance nominal $\varnothing$ : h7
