## Description

## Version:

Cutting chisel edge with high centring accuracy due to strong core and special point

## geometry.

Particularly high alignment accuracy due to $\mathbf{4}$ guide chamfers which stabilise the drill even at extreme depths!
Convex cutting edges with honed edges and special flute profile for short chips, even on long chipping materials.

## Advantage:

High process reliability and surface quality of the hole.

## Recommendation:

Maximum drilling depth:
flute length (see table) less $1.5 \times$ nominal $\varnothing$.

## Note:

Flute length $L_{C}=L_{2}+1.5 \times D_{c}$.
For process reliability when using the $12 \times$ D drill, an initial centre drilling with NC spotting drills No. 121068-121130 is necessary.
Form HB and HE are supplied at the same price as HA.
Form HB: order with No. 123302.
Form HE: order with No. 123301 + 129100HE.
