## Description

## Version:

Spiral fluted, with $\mathbf{6}$ guide chamfers and internal cooling channels. New generation of high performance deep hole drills in the HPC range. With $135^{\circ}$ point angle and special h7 cutting edge tolerance for optimum generation of a deep hole. High roundness and alignment accuracy of the deep hole.

## Recommendation:

Maximum drilling depth:
Flute length (see table) less $1.5 \times$ nominal $\varnothing$.

## Note:

Flute length $L_{C}=L_{2}+1.5 \times D_{C}$.
For process reliability when using the $16 \times$ D deep hole drill, an initial centre drilling with No.
$121068-121130$ or $4 \times$ D pilot drilling operation with pilot drill No. 122606 is necessary. For deep holes greater than $20 \times \mathrm{D}$, a $6 \times \mathrm{D}$ pilot hole with pilot drill No. 122606 is absolutely essential.
The generation of a pilot hole improves process reliability. See also pages 129/130.
