Description

Version:

German top quality product. Precision tooth geometry and very fine ground side faces. Significant increase in service life and protection against edge build-up due to the **nitrided surface.**

Application:

For low speed machines (approx. 50 rpm).

Pitch t: (tooth form).

- \cdot 4 mm (BW) For profiles and pipes with 1.0 1.5 mm wall thickness.
- 5 / 6 mm (HZ) For medium profiles, pipes and solid bar with 1.5 20 mm wall thickness / cross-section.
- · 7 / 8 mm (HZ) For thick profiles and solid bar up to approx. 50 mm wall thickness / cross-section.
- \cdot 10 16 mm (HZ) For extra thick cross-sections and solid bar more than 50 mm.

Noto

- For stainless steels (such as V2A) the correct cutting speed and lubrication is crucial (see information in the machining handbook No. 110020).
- The concentricity and axial run-out values are considerably better than those to DIN 1840, in some cases by up to 50 %.
