| Order number | 179820 100X1,6 |
| GTIN         | 4045197247339  |
| Item class   | 17C            |

## Description

### Version:

Top quality German product with **precision toothing** and **hollow ground mirror finish sides**. Compared to HSS saw blades, the cutting speed can be increased by a factor of 3 to 4.

**DIN 1838 B coarse-toothed** with **curved teeth to form B** with chisel edge. **For cutting larger cross sections and greater cutting depths**. These blades are suitable for more universal use due to the improved chip formation and larger gullets compared to the fine-toothed version.

### Note:

- **Stable conditions of machine and component clamping are important prerequisites. If these conditions are disregarded the circular saw blade may break.**
- **The values for radial run-out and axial run-out are considerably better than the values specified in DIN 1840.**
- **Special sizes on request.**

Standard: DIN 1838

Thickness: 1.6 mm

Bore Ø: 22 mm

No. of teeth Z: 50

## Technical description

|                 |                    |
