

**Re-Bo**

**Solid carbide circular saw blade DIN 1838 B coarse, uncoated, Ø×thickness: 25X0,8 mm**

## Order data

Order number	179820 25X0,8
GTIN	4045197246745
Item class	17C

## Description

### Version:

Top quality German product with **precision toothing** and **hollow ground mirror finish sides**. Compared to HSS saw blades, the cutting speed can be increased by a factor of 3 to 4.

**DIN 1838 B coarse-toothed** with **curved teeth to form B** with chisel edge. **For cutting larger cross sections and greater cutting depths**. These blades are suitable for more universal use due to the improved chip formation and larger gullets compared to the fine-toothed version.

### Note:

- **Stable conditions of machine and component clamping are important prerequisites. If these conditions are disregarded the circular saw blade may break.**
- **The values for radial run-out and axial run-out are considerably better than the values specified in DIN 1840.**
- **Special sizes on request.**

Standard: DIN 1838

Thickness: 0.8 mm

Bore Ø: 8 mm

No. of teeth Z: 24

## Technical description

Thickness	0.8 mm
Ø	25 mm
Bore Ø	8 mm
No. of teeth Z	24
Coating	uncoated
Tool material	Solid carbide
Standard	DIN 1838
Type of product	Circular saw blade
