## Re-Bo

Solid carbide circular saw blade DIN 1838 B coarse, uncoated, $\varnothing$ xthickness: $40 \times 2,5 \mathrm{~mm}$

Order data

| Order number | 179820 40X2,5 |
| :--- | :---: |
| GTIN | 4045197246981 |
| Item class | $17 C$ |

## Description

## Version:

Top quality German product with precision toothing and hollow ground mirror finish sides.
Compared to HSS saw blades, the cutting speed can be increased by a factor of 3 to 4 .
DIN 1838 B coarse-toothed with curved teeth to form $\mathbf{B}$ with chisel edge. For cutting larger cross sections and greater cutting depths. These blades are suitable for more universal use due to the improved chip formation and larger gullets compared to the fine-toothed version. Note:

- Stable conditions of machine and component clamping are important prerequisites. If these conditions are disregarded the circular saw blade may break.
- The values for radial run-out and axial run-out are considerably better than the values specified in DIN 1840.
- Special sizes on request.

Standard: DIN 1838
Thickness: 2.5 mm
Bore $\varnothing: 10 \mathrm{~mm}$
No. of teeth Z: 24

## Technical description

| Bore $\varnothing$ | 10 mm |
| :--- | :---: |
| Thickness | 2.5 mm |
| $\varnothing$ | 40 mm |
| No. of teeth Z | 24 |
| Coating | uncoated |
| Tool material | Solid carbide |
| Standard | DIN 1838 |
| Type of product | Circular saw blade |
