### **Description**

#### **Version:**

Clamping heads, round profile, in 0.5 mm increments. Please specify required clamping Ø with order.

Smooth version for precision machining.

#### **Advantage:**

- · 25% greater clamping force than clamping head RD.
- · No radial movement between clamping head and clamping element mounting, therefore immune to dirt.
- · Unique stiffness due to large seating area of the clamping segments.

#### **Application:**

Versatile application range, machining centres, measuring machines or pallet clamping.

#### **Recommendation:**

Clamping heads for special profiles to your individual requirements on request. Note:

Other taper sizes and shapes (e.g. square) and machinable blanks on request!
