

Neodymium magnetic clamping block, Length: 140 mm

Order data

Order number	380870 140
GTIN	4045197311313
Item class	33\$

Description

Version:

- Extremely high clamping force due to specially developed process.
- · Sturdy all-steel body with an ON-OFF switch on the end face.
- · Lamellae made of 2 mm brass / 4 mm steel.
- · Neodymium magnetic system.

Application:

- · For components which are difficult to clamp, such as Ferrotic, carbide with cobalt.
- · For spark erosion and grinding.

Note:

Adaptors optionally available for all zero-point clamping systems GARANT Zeroclamp on the market (Partool, 3R, Mecatool, Erowa, etc.). **Please supply the respective data when ordering.**

Width: 70 mm Height: 51 mm

Height tolerance: +0,5 / -2 mm Magnetic field height: 4 mm

Weight: 3 kg

Nominal clamping force: 180 N/cm²

Technical description

Magnetic field height	4 mm
Height	51 mm

Width	70 mm
Length	140 mm
Weight	3 kg
Nominal clamping force	180 N/cm ²
Height tolerance	+0,5 / -2 mm
Type of product	Magnetic clamping plate
