

## Spring balance, maximum measuring range: 40N cN or N

### Order data

Order number	478900 40N
GTIN	4045197208170
Item class	42H

### Description

#### Version:

Sturdy metal housing in practical design; hammer finish. Clear dial face with double scale for measuring in both directions. With pointer and memory pointer.

#### Application:

For electrical engineering and fine mechanical work, e.g. setting the contact pressure of relay springs, checking the brush pressure on motors or for adjusting tension or compression springs.

#### Accuracy:

$\pm 0.01 \times (\text{measuring range} + \text{measured value})$ .

Calibration: K1

Measuring range: 4 - 40 N

Scale graduations: 1 N

Probe length L: 48 mm

Dial face  $\varnothing$ : 72 mm

### Technical description

Dial face $\varnothing$	72 mm
Measuring range	4 - 40 N
Probe length L	48 mm
Scale graduations	1 N
Calibration	K1

Measurement technology	analogue
Type of product	Spring balance (contactor)

**Services**

Labelling laser-etched Type	018940
Calibration Spring balance	018870
