

Degussit oxide ceramic fine abrasive file, three- square, Length×width (grit designation): 120X13F mm

Order data

| | |
|--------------|----------------|
| Order number | 558950 120X13F |
| GTIN | 4045197407245 |
| Item class | 53D |

Description

Version:

The exceptionally high hardness of highly sintered Aluminium Oxide ceramic, free of binding agents, gives the fine abrasive tools an excellent edge and profile stability (synthetic ruby) for an outstanding surface quality.

Sintered ruby fine abrasive **files** in grit grades **fine (F)** (Ra approx. 1 µ, equivalent to about 2000 grit).

Application:

For precision work in tool and mould making, in precision mechanical manufacture, optical and glass industry, porcelain manufacture etc. For applying chamfers, for notching, and for changes of shape.

Grit: 2000
