# Garant

### Disc brush, silicon carbide (SiC), Ø 50 mm, Grit: 80

### **Order data**

Order number	575006 80
GTIN	4045197977694
Item class	51P

## Description

#### **Version:**

Conical brushes for inaccessible places. Greater flexibility.

Disc brushes with **extremely tightly packed abrasive bristles (right to the edge of the brush)** embedded in the plastic pad. The bristles support each other, giving a **highly stable shape**. Very long working life.

With longitudinal groove for clamping on face mill arbors (DIN 6357) and combination face mill adapters (DIN 6358).

Nylon bristles with very high **silicon carbide grit content** for general-purpose use.

#### **Advantage:**

- · Workpiece post-processing directly after the machining process.
- · Reproducible results due to continuous exposure of the abrasive grit.
- · Process reliability thanks to high stability and accuracy of the shape.
- · Quick and secure mounting without further accessories.
- Very high concentricity.

#### **Application:**

On **CNC** machining centres and when used by robots, preferably wet grinding with cooling lubricant. Machining of flat components: precise **deburring**, **edge rounding**, **finish machining** after milling, **surface finishing** e.g. of sealing and mating faces.

#### Note:

Special versions available on request.

Grinding medium code: SiC Bore  $\emptyset$  d<sub>1</sub>: 16 with groove mm

Grit designation: coarse Bristle thickness: 1.2 mm

# **Technical description**

Grit	80
Grit designation	coarse
Bristle thickness	1.2 mm
Feed	800 - 3000 mm/min
Infeed	0.3 (fine) – 1.5 (coarse) mm
Product name attribute	Ø 50 mm
Brush Ø D₁	50 mm
Disc dia. D <sub>2</sub>	45 mm
Grinding media	Silicon carbide (SiC)
Grinding medium code	SiC
Bristle length L <sub>3</sub>	30 mm
Working area ∅	50 mm
Bore Ø d <sub>1</sub>	16 with groove mm
recommended speed	1500 - 2500 rpm
maximum speed	4500 rpm
Type of product	Disc brush

## **Accessories**

Tightening screw with internal cooling for mandrel Ø 16	5
mm
