Garant

Wheel brushes with shank, silicon carbide (SiC), Ø 50 mm, Grit: 120

Order data

Order number	575052 120
GTIN	4045197977755
Item class	51P

Description

Version:

Round brushes with **extremely tightly packed abrasive bristles (right to the edge of the brush)** embedded in the plastic pad. The bristles support each other, giving a **highly stable shape**. Very long working life. Nylon bristles with very high **silicon carbide grit content** for general-purpose use.

6 mm shank, solidly cast in place.

Advantage:

- · Workpiece post-processing directly after the machining process.
- $\cdot\,$ Reproducible results due to continuous exposure of the abrasive grit.
- · Process reliability thanks to high stability and accuracy of the shape.
- · Quick and secure mounting without further accessories.
- · Very high concentricity.

Application:

On **CNC machining centres** and when used by robots, preferably **wet grinding** with cooling lubricant. **For grinding side faces and inner faces:** precise deburring (e.g. threads), edge rounding, delicate work after milling, surface finishing.

Note:

Special versions available on request. Bristle width L₁: 13 mm Grinding medium code: SiC Grit designation: medium Bristle thickness: 0.6 mm Shank \emptyset D_s: 6 mm

Technical description

recommended speed	2400 - 2800 rpm
Brush Ø D ₁	50 mm
maximum speed	4500 rpm
Bristle thickness	0.6 mm
Length of brush section H ₁	13 mm
Grit	120
Grit designation	medium
Infeed	0.3 (fine) – 1.0 (coarse) mm
Feed	800 - 3000 mm/min
Grinding medium code	SiC
Grinding media	Silicon carbide (SiC) grit
Shank Ø D _s	6 mm
Product name attribute	Ø 50 mm
Bristle width L ₁	13 mm
Propulsive equipment	CNC machining centres, robot applications
Type of product	Wheel brush
