

Measurement transducer, maximum torque: 100 Nm

Order data

Order number	654255 100
GTIN	2050001023513
Item class	63B

Description

Version:

High accuracy due to measurement processing / digitising directly within the measurement transducer. Insensitive to lateral forces due to particularly flat form.

Suitable for :

Workshop torque analyser No. 654250.

Note:

Analysers and measurement transducers with other measuring ranges available on request.

Calibration: O4

Measuring range: 2 - 100 Nm

Weight: 2.5 kg

Square socket: 3/8 inch

Technical description

Weight	2.5 kg
maximum torque	100 Nm
Measuring range	2 - 100 Nm
Square socket	3/8 inch

Direction of tightening	For right and left-hand tightening
Test certificate	Manufacturer's test certificate
Calibration	04

Services

Calibration Torque analyser / sensor maximum torque 400/2 Nm	018860 400/2
Calibration on both sides Torque analyser / sensor maximum torque 400/2 Nm	020140 400/2

Accessories

Square drive calibration adaptor Type 1	654383 1
