

Measurement transducer, maximum torque: 20 Nm

Order data

Order number	654255 20
GTIN	2050001023506
Item class	63B

Description

Version:

High accuracy due to measurement processing / digitising directly within the measurement transducer. Insensitive to lateral forces due to particularly flat form.

Suitable for :

Workshop torque analyser No. 654250.

Note:

Analysers and measurement transducers with other measuring ranges available on request.

Calibration: O4

Measuring range: 0.4 - 20 Nm

Weight: 1.7 kg

Square socket: 1/4 inch

Technical description

Weight	1.7 kg
Square socket	1/4 inch
Measuring range	0.4 - 20 Nm
maximum torque	20 Nm

Direction of tightening	For right and left-hand tightening
Test certificate	Manufacturer's test certificate
Calibration	04

Services

Calibration Torque analyser / sensor maximum torque 400/2 Nm	018860 400/2
Calibration on both sides Torque analyser / sensor maximum torque 400/2 Nm	020140 400/2
