

Torque screwdriver with scale, to take interchangeable blades, maximum torque: 500 cNm

Order data

Order number	659906 500
GTIN	4045197611239
Item class	61E

Description

Version:

Power grip with comfortable easy-grip **Haptoprene**® surface allows transmission of the required torque with no problems even with **wet or oily hands.** On reaching the set torque value, the screwdriver can be felt and heard to trigger and is then again immediately ready for use. The release torque is higher than the tightening torque (overload protection). The desired torque is set using an adjustment wheel at the end of the handle. Putting the wheel into the locked position prevents inadvertent changes to the setting. Easy to read micrometer scale, protected against dirt. To **take 6 mm interchangeable blades** (No. 659920 – 659928).

Standard:

Geprüft nach DIN EN ISO 6789.

Note:

The guaranteed measuring accuracy of the torque is achieved only once the torque range has been calibrated to DIN EN ISO 6789.

Direction of tightening: Right-hand tightening

Torque measuring accuracy: ±6 %

Test certificate: Manufacturer's test certificate

Calibration: 01

Torque measuring accuracy: ±6 %

Overall length L: 124 mm Torque range: 100 - 500 cNm Torque range: 1 - 5 Nm

Scale graduation, 1 graduation =: 10 cNm

maximum Ø: 35 mm

Technical description

suitable interchangeable blades maximum torque Display Torque measuring accuracy Torque range Torque Torque range Torque Torque range Torque Torque Measurement process Torque Setting the trigger value Weight trigger value Weight Torque Torque Torque Setting the trigger value Torque Setting the trigger value Torque Setting the trigger value Torque Torque Setting the trigger value Torque scewdriver Torque fixed setting	Scale graduation, 1 graduation =	10 cNm
