Your Torque Partner

Torque screwdriver with scale, maximum torque: 500 cNm

Order data

Order number	659939 500
GTIN	4560138455166
Item class	66F

Description

Version:

Torque screwdrivers with over-torque protection for different applications from series production to maintenance work. With a locking mechanism that prevents adjustment of the torque when in use. The hexagon lock shape prevents rolling away. Setting by using micrometer scale. Profiled light metal handle.

Function:

When the set torque is reached the screwdriver triggers and signals clearly (audibly and perceptibly). It is then again immediately ready for use. The trigger mechanism is unavailable for tightening left-handed threads.

Standard:

Geprüft nach DIN EN ISO 6789.

Note:

The guaranteed measuring accuracy of the torque is achieved only once the torque range has been calibrated to DIN EN ISO 6789.

Direction of tightening: Right-hand tightening

Torque measuring accuracy: ± 3 %

Bit socket: F 6.3

Test certificate: Manufacturer's test certificate

Calibration: O1

Torque measuring accuracy: ±3 %

Overall length L: 155 mm

Torque range: 100 - 500 cNm

Torque range: 1 - 5 Nm

Scale graduation, 1 graduation =: 5 cNm

Ø: 33 mm
