### Description

#### Version:

The TY® bits are 29 mm long. The additional length of 4 mm compared to 25 mm bits provides a longer torsion zone, resulting in longer working life. Ideal for high-powered power drills and impact screwdrivers. Bits are stored in the BitBuddy® plastic holder, allowing easy one-handed change of the bit directly from the holder into the screwdriver.

#### Advantage:

The coloured bits can be found quickly and easily, and thanks to the fluorescent coating can be found even **in the dark using UV light**.
