| Order number | 788041 76 |
| GTIN | 4058546228767 |
| Item class | 76G |

Description

Version:

Carbide teeth for a longer working life, even when drilling into dense materials. Wide and deep flutes for easy removal of the drilled core. Aggressive tooth geometry for up to 10x quicker drill progression in comparison to bi-metal hole saws. Ideal for use in the electronics area and installation area.

Application:

For drilling larger holes and breaking throughs in various materials: masonry, lightweight materials, plastics, and wood. Unsuitable for use in hard materials such as concrete, granite, natural stone and hard tiles with a hardness greater than 30 N/mm².

Note:

Use only with rotary drive (no impact).

Tool material: Carbide

Number of cutting edges Z: 3

maximum cutting depth: 60 mm

For use on: Switch boxes, cavity wall boxes and distribution boxes, recessed lighting

Technical description

| | |
|---------------------------|-------|
| Number of cutting edges Z | 3 |
| maximum cutting depth | 60 mm |
