

## Garant

**Carbide-tipped hammer drill SDS-plus, Ø×overall length: 14X210 mm**

### Order data

Order number	789040 14X210
GTIN	4062406135768
Item class	71C

### Description

#### Version:

Drill head with square cross-section. **4x90° geometry** with specially developed **equal height tips** and stable shoulders ensure precisely dimensioned holes for professional setting of anchors and secure plug attachment. 4-flute drilling heads for smooth drilling with low vibration and optimum guidance in the drilled hole. **Radially** shaped **reinforcement protection**: prevents jamming when hitting reinforcements and increases the working life. Sturdy **single-piece** carbide head with 4 cutters, inserted as a solid item in the core of the drill. Significantly reduced risk of breakage.

#### Advantage:

- **Short spiral starts ensure a smooth evacuation of the drill dust.**
- **Wear marks: for evaluation whether the tool is still suitable for drilling holes suitable for insertion of plugs.**
- **4x4 design permits a precise radial run-out and minimise wear and loss of frictional grip.**

#### Application:

For drilling concrete, natural stone, and masonry – with very high drilling comfort.

Shank: SDS Plus

Flute length: 160 mm

### Technical description

overall length	210 mm
Ø	14 mm
Flute length	160 mm
Tool material	Carbide
Use with impact / without impact	Impact drilling

Shank	SDS Plus
Type of product	Masonry drill
