

Hydraulic ram, Type: 1

Order data

Order number	881800 1
GTIN	4021176005053
Item class	83U

Description

Version:

Steel body with hydraulic mechanism and automatic return. Easy handling: the ram is used between extractor spindle and shaft. Clamp ram with extractor spindle and tighten ram spindle (hydraulics come into effect). If the travel is insufficient, release the ram spindle and repeat the procedure.

Application:

For increasing the power of mechanical extractors from Size 3. Even tightly seized parts can easily be freed.

Construction height: 62 mm

Ram cylinder Ø: 14 mm

Body Ø: 37 mm

Stroke: 10 mm

maximum permissible torque: 35 Nm

maximum permissible extraction force: 100 kN

Technical description

Construction height	62 mm
maximum permissible extraction force	100 kN
maximum permissible torque	35 Nm

Ram cylinder Ø	14 mm
Body Ø	37 mm
Stroke	10 mm
